

Product Spotlight

FRACURE EMULSION Concrete Curing

PRODUCT DETAILS

FRACURE EMULSION

An acrylic curing compound, that when applied, forms a tough film that not only controls moisture loss in the concrete but protects the new concrete against staining and marking during construction.

FRACURE EMULSION is also available in a formulation that exceeds the ASTM C309 standard when applied at 5m² per litre.

FRACURE EMULSION can be used internally or externally and is compatible with most paints and adhesives (check with paint/adhesive supplier first).

Featured Project Details

LOCATION: Ormiston Road, East Tamaki, Auckland
DEVELOPER/BUILDER: Lion Nathan / Mainzeal
CONTRACTOR/PLACER: Wrathalls: concrete / GDP Flooring: FRACURE Emulsion
