

Product Spotlight

RETARDÉ E XTRA Exposed aggregate

PRODUCT DETAILS

RETARDE E XTRA

A concrete surface retarder which when applied to the surface of freshly poured concrete retards its set to a depth of 3-6mm while the underlying concrete hardens normally. The retarded concrete can then be brushed or washed off leaving aggregate exposed but firmly bedded. Use on concrete 25MPa or more.

Uses include exposed aggregate driveways, paths, patios, pre-cast, swimming pool surrounds, stop-end construction key joints, etc.

Other retarders available are:

- Retardé E, use on 25MPa or less
- Retardé M, paint on retarder for formwork
- Etching Fluid, for deeper etching on formwork

Featured Project Details

LOCATION: Marsden Valley, Nelson

DEVELOPER/BUILDER:

CONTRACTOR/PLACER: Asphalt & General.

ENGINEER/ARCHITECT: —

JOB DETAILS

Marsden Park Sub-Division, Marsden Valley, Nelson. Contractor called in to complete work and used Retardé E Xtra for the footpaths, vehicle crossings and feature areas. The work was done during the winter 2010 and Retardé E Xtra provided the best performance in the cold conditions.
